CAREER OBJECTIVE

My objective is to secure a challenging role in the field of software engineering where I can leverage my diploma in software engineering from a purposeful technical institute, as well as my one-year experience as a technical assistant and digital technician. With my strong communication and organizational skills, I am committed to delivering exceptional results for both the company and clients.

EDUCATION

- Technical Diploma in Computer Engineering with a specialization in Software Engineering from Damascus University. **(2022)**

COURSES & TRAININGS

- (ICDL), Digital Markiting from Google, web development technologies from Coursera, React.JS course from Udemy.

EXPERIENCES

- **Customs Clearance (2023/3 - 2022/9)**
I worked in customs clearance at Abu Dhabi Customs for **6** months. Responsible for preparing and printing customs declarations, preparing financial invoices, and dealing with e-mails, in addition to the ability to withstand extreme pressure.

- **Sales supervisor & Manager (2015 - 2019)**
I worked in my library in Syria, selling and distributing books and stationery to schools, as well as providing printing and photocopying services, personal photos, and doing all office work.

In addition to, Experienced in managing and troubleshooting various technology equipment such as computers, servers, routers, repeaters, smart devices and other networking devices.Proficient in identifying and resolving technical issues, ensuring optimal system performance and uptime.Familiar with various software applications and programming languages.A quick learner who adapts to new technologies with ease.

PROJECTS

- **Al-Bahar web application (2023)**
An administrative web application to manage the customs clearance office where I work, to store and archive companies' authorizations and customs declarations for easy search and access, with a full-function admin control panel with full security.
Used: HTML, CSS, Bootstrap, JavaScript, PHP, MySQL

- **Personal website (2022)**
A personal introductory website that plays the role of a CV, as it contains all personal information with a page for projects such as an exhibition and other pages that includes education levels, skills, interests, languages, etc.
Used: HTML, CSS, JavaScript, PHP, MySQL

- **TCC web application (2022)**
a graduation project to manage the college and archive and store its data to help students and facilitate their access to the information they need.
Used: HTML, CSS, JavaScript, PHP, MySQL
